

SRIKANTH METPALLY

Ph.No: +91-9652921682

Email: srikanthmetpally08@gmail.com

Objective

To work in a globally competitive environment on challenging assignments that shall yield the twin benefits of the job satisfaction and a steady-paced professional growth. As a dedicated and dynamic individual with proven result in delivering capability, looking forward to emerge as a paramount test engineer, continue pursuing more challenges and with continuous learning enriching my knowledge in the field of quality assurance.

Experience Summary

- 3.8 Years of industry experience in the area of Software Testing (Manual and Automation).
- Actively involved in creation of test cases and test scenarios for different application modules according to functional requirements and business specifications.
- Expertise in Sanity, functional, regression testing.
- Expertise in **Core Java Concepts** like **OOPS, Collections and Exception Handling**
- Having strong Knowledge in developing **Data driven** and **Hybrid frame works using Selenium with JAVA.**
- Well versed with **Page Object Model** using Java Selenium.
- As a member of the **Scrum team** participated in daily standup meetings, project status meetings as well as retrospective meetings and iteration reviews.
- Identified, analyzed, and documented defects utilizing **JIRA** as defect tracking system.
- Well versed with test management tools like **TestRail, JIRA.**
- Worked closely with **Development team, BA and QA teams** as well as members of Management.
- Responsible for **defect tracking, defect reporting and defect reproducing.**
- Tested applications **compatibility** on different browser versions (Chrome, Firefox and IE) using **Selenium**
- Involved in system integration and user acceptance testing (**UAT**) on later stages of SDLC.
- Expertise in Functional Testing, End to End Software Testing, Regression Testing and Smoke testing for Web Applications.
- Expertise in software engineering process and various life cycles model like Water Fall and **Agile Model.**
- Possess good presentation, communication and interpersonal skills.
- Strongly self-motivated, willing to assume responsibilities, Innovative & Proactive.
- Have fast Learning skills and willing to do challenging roles in the team.

Education qualification:

- Completed B.Tech from **Malla Reddy Engineering College(MREC)**, Hyderabad.
- Completed Diploma from Govt.Polytechnic College, Nizamabad.
- Completed **SSC** from SRI NAGABHUSHANA VIDYALAYAM, Basar.

Work Experience:

- Working as Software Test Engineer for Magnaquest Technologies from June 2018 to till now.

Technical Skills:

Programming Languages	Core Java
Database	Basics in SQL
Test & Defect Management Tools	JIRA, Test Rail
Testing Tools	Selenium-Web Driver

Project Experience Summary:**Project 1:**

Organization : Magnaquest Technologies

Title : LogNest

Client : Richard McMahon, Canada

Tools : SELENIUM WEBDRIVER, TESTNG, HYBRIDFRAMEWORK

Role : Test Engineer

Duration : 2.1years

Environment : CRM(Customer Relationship Management)

Domain : Sales

Project Objective:

LogNest is a CRM Software System that helps businesses to manage their customers data and interactions. CRM Software is used for things like tracking customer's satisfaction levels, issuing surveys and managing customers support request. CRM contain several modules like Advertisement, Responses, Profiles, Accounts, Invoices etc.,

The goal is simple: To improve business Relationships, to stay connected to customers and improve Profitability.

Roles and Responsibilities:

- Understanding Test Requirements and analyzing the Application.
- Creating Parameterization, Synchronization and define Test results.
- Creating Page related methods using Locators
- Enhancing Test cases using Java Programming.
- Debugging Test Cases and Fixing Errors.
- Executing/Running Test Cases
- Defect Reporting & Tracking
- Finding solutions for Object Identification issues and error handling issues.
- Inspecting Elements, Create Test Cases using Element locators and Selenium WebDriver Commands.
- Collecting Test Data for Data Driven Testing.
- Attending daily Stand-up calls and Retrospective meetings.

Project 2:

Organization : Magnaquest Technologies

Title : JUMIA online shopping

Client : Michael, Brazil

Tools : Manual testing, jira, aligemethodology
Role : Test Engineer
Duration : 5Months

Project Objective:

JUMIA is a online shopping, it is a sales domain, it has so many module like men, women, kids, furniture, accessories etc. We can do shopping from any of the country.

Roles and Responsibilities:

- Understand System Requirement and Functional Requirement documents
- Written functional test cases and scenarios for the modules
- Prepared Test Data and Executing the Test cases.
- Reported and tracked defects to the Test Lead using excel
- Facilitated meetings with the developers to resolve issues and defects.
- Involved in Functional, Regression and Retesting
- Sending Daily and weekly status report to lead.

Project 3:

Organization : Magnaquest Technologies
Title : Lafarge
Client : Robert, Russia
Role : Test Engineer
Duration : 1.2years
Platform : ERP(Enterprise Resource Planning)
Domain : Manufacturing
Tools : Manual testing, jira, TestRail, aligemethodology

Project Objective:

Lafarge is a ERP system used to track business resources (such as cash, raw materials, and production capacity) and the status of commitments made by the business (such as customer orders, purchase orders, and employee payroll), no matter which department (manufacturing, purchasing, sales, accounting, and so on) has entered the data into the system.

Lafarge facilitates information flow between all business functions inside the organization, and manages connections to outside stakeholders.

Roles and Responsibilities:

- Understand System Requirement and Functional Requirement documents
- Written functional test cases and scenarios for the modules.
- Peer to Peer reviews of Test Cases
- Prepared Test Data and Executing the Test cases.
- Reported and tracked defects to the Test Lead using excel
- Facilitated meetings with the developers to resolve issues and defects.
- Involved in Functional, Regression and Retesting
- Sending Daily and weekly status report to lead.
